MARK VANDENBECKENS

Aspiring CEO/Founder of Sports Equity Systems (SES)
Fennimore, WI
Email: Mark_beckens@yahoo.com
LinkedIn: https://www.linkedin.com/in/mark-vandenbeckens/
GitHub (SES Repository): https://github.com/markbeckens-lgtm/SES

Four Pillars Summary

These pillars guide how I build SES and the systems behind it:

Systems Thinking — I design processes and structures that scale as SES grows.
Technical Competence — I build and test foundational systems myself before delegating.
Documentation Discipline — I maintain clear, repeatable procedures to support future team onboarding.
Long-Term Vision — SES is built for sustainability, fairness, and operational clarity.
This portfolio reflects the technical groundwork supporting my role as a founder.

Technical Toolbelt

Core Systems
Windows 10/11
Windows Server (Lab environment)
Virtualization (Hyper-V / VirtualBox)

Hardware Skills
RAM & storage installation
Peripheral troubleshooting
Basic diagnostics

Software & Cloud Tools
Visual Studio Code (Primary development environment for SES)
Microsoft 365
OneDrive
GitHub (SES repository & version control)

Software Development Spotlight

Scenario:

Designed and developed the Sports Equity Systems (SES) platform using Visual Studio Code, focusing on clean architecture, modular structure, and scalable logic.

Steps Taken (High-Level):

Built SES features and logic directly in Visual Studio Code
Structured project files for clarity and long-term maintainability
Used integrated terminal for testing and iterative development
Applied version control through Git and GitHub to track progress and changes
Utilized AI-assisted development to accelerate design and problem-solving

SPORTS EQUITY SYSTEMS

Educational Roadmap

Southwest Tech — Programming Degree (In Progress, Expected 2028)
Towson University – BA - Economics and Marketing - 1999
Finger Lakes Community College – AAS - Business Administration 1994

Licenses & Certifications:

Cisco Networking Academy – Cybersecurity Essentials
Issued Mar 2026 · Expires Mar 2029

FOA Fiber Optic Cabling Certification
Issued Feb 2026 · Expires Feb 2029

FOA CPCT – Certified Premises Cabling Technician
Issued Dec 2025 · Expires Dec 2028

Development Environment & Workflow

I use Visual Studio Code as my primary development environment for SES.
My workflow includes:

Maintaining SES source files and documentation
Version control through Git and GitHub
Structured project organization for scalability
Integrated terminal for testing and automation
This environment supports both the technical and organizational needs of SES as it grows.

Founder Identity

Sports Equity Systems (SES) is my long-term vision: a structured, fair, and scalable system designed to bring clarity and consistency to sports operations. My technical work, documentation habits, and development environment all support this mission.
